Monitor Networktraffic: how it is put together

sketched from the files

Monitor Networktraffic: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what Monitor Networktraffic is for

WHAT IT IS

A small project in Python, Markdown, Text. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: main.py, README.md, requirements.txt.

WHAT COMES OUT

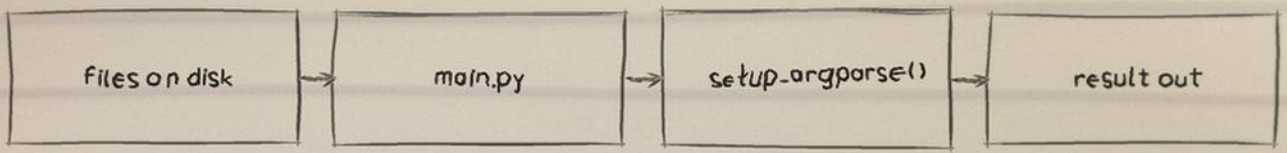

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

Monitor Networktraffic. data flow, in one direction

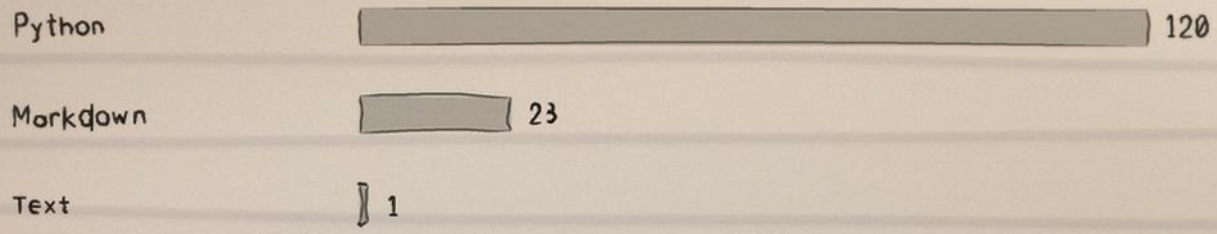

One direction. Anything the code does not do is not drawn.

second sheet, GK

Monitor Networktraffic in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

5 files in the tree.
5 commits, first 2025-05-09, last 2026-10-30, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

Monitor Networktraffic: schematic of the apparatus

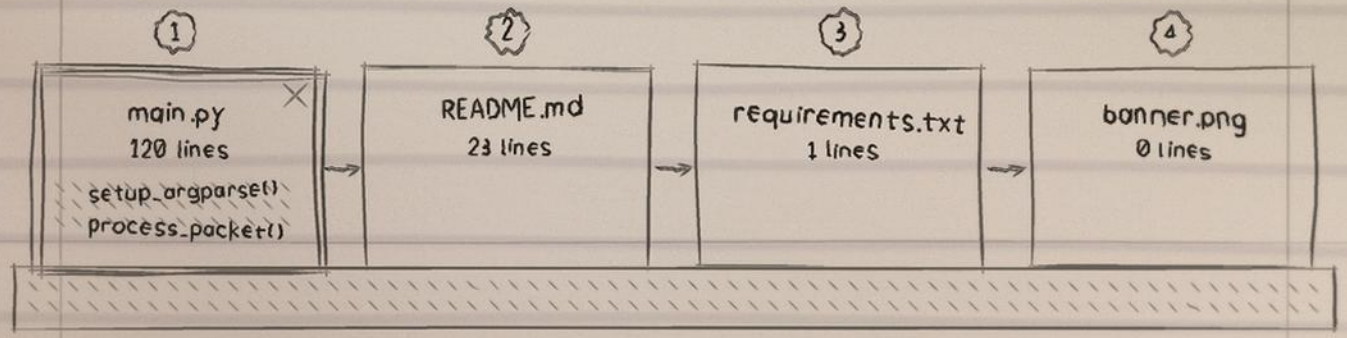

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. main.py
2. README.md
3. requirements.txt
4. banner.png

in flow order, first to last

base plate: the repo itself, sectioned

span: 5 files, 144 lines counted

turns of the crank so far: 5 commits, 2025-05-09 to 2026-10-30

measured and sketched, GK
